### APPLICATION FOR NON-STANDARD WATER SERVICE

\_\_\_\_\_ (“Applicant”) requests non-standard water utility service from East Central Special Utility District (“District”). Applicant understands and agrees that retail water utility service will only be available under the terms and conditions of the District’s Operating Policy, the regulations of the Texas Commission on Environmental Quality (“TCEQ”), the Texas Water Code, and the Texas Health & Safety Code, and applicable state and federal laws and regulations.

By signing and submitting this Application for non-standard retail water utility service, the Applicant declares that the Applicant is the owner of the property requesting service or a developer with legal, contractual rights to develop the property. If Applicant is not the landowner or developer, Applicant must have written legal authority to make this Application and to bind the landowner/developer to the terms of any resulting service contract. (Attach a copy of sworn power of attorney).

The information solicited below shall be the minimum information required for the Applicant to initiate non-standard service to the property. The Applicant shall also be required to timely provide any additional information required by the District and/or its designated consulting engineers to evaluate the service request, its effects on the District’s existing water system and customers, and any additional service capacities that might need to be developed to fulfill this request.

This is only an application for non-standard service. East Central SUD is not obligated to provide service until the Application has been evaluated, and a final Non-Standard Service Agreement has been executed by all necessary parties. **Additional fees may be assessed if there are any modifications after the application is submitted.**

Please attach the following required documents:

- Master Development Plan or Site Plan
- Written confirmation from the City/County stating fire requirements for development. The response must include the fire flow in gallons per minute and any additional requirements for the project.
